Pre-Lab Deliverable (1)

The labs so far have gone very well, but not without issues. The first thing we should do is to make the code more modular and therefore more easy to understand, fix and update. The other thing we need to do is ensure that we are displaying the data consistently with other squadrons on our LCD (and to also check that we consistently get the same data as the data transmitted by other squads. We also need to optimize our final ventilation shaft run and the data transmission in that run needed to coordinate all the CX bots.
